Retail Turnover increased by 0.4 per cent in the June 2019 quarter, down from 1.2 per cent in the pcp. Retail Turnover is tracking ahead of Chain Volume Measures indicating that price inflation is the main driver of growth.

STATE BY STATE: BEST AND WORST

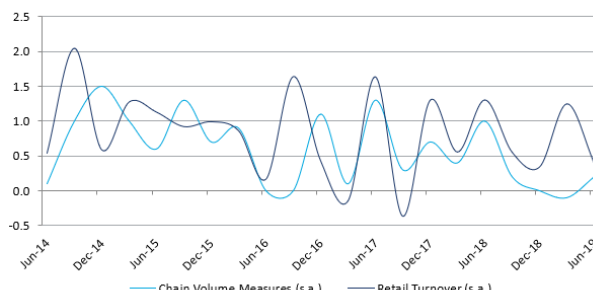

Retail turnover varies within the ABS defined six categories and across different jurisdictions. The adjacent map outlines and compares the total and growth of retail trade (y-o-y), and the best and worst retail growth categories.
